

ALEKS Instructions

Students log on to www.connected.mcgraw-hill.com

Students login Username: `firstname.lastname`

(some students have an 88 or 99 at the end of their last name....they should know that)

Students Password: `jlunch#`

If a student's login/password doesn't work.....first make sure they tried with 88 and 99 then please email Jamie White at jamie.white@jasperisd.net to receive their login information.

First Time Login to ALEKS instructions:

- Click on their Class Textbook icon
- Click on the multi-colored pie chart icon
- Click on ALEKS icon
- You will then be given a tutorial of how to navigate ALEKS -
Click *Get Started*
- After the tutorial you will be given a 30 question diagnostic which will individualize your learning path. Please answer questions honestly and to the best of your ability because the program will make you re-learn what you do not know.

Click *Start Knowledge Check*

When students log back on they will need to go through the screens explaining their pie and percentages. When they have looked through all the screens they should be able to start my path.....some may say continue my path....if they started after they finished their diagnostic.

If screens go blank while students are working try F5.

Each student path will be different based on their diagnostic test. They are to work a lesson a day or 5 lessons a week. All of their work and time is sent to their math teacher.

THANKS ☺
